

DACS: The Data & Analysis Center for Software

The Data and Analysis center for Software (DACS) is a U.S. Department of Defense (DoD) Information Analysis center (IAC) that serves as an authoritative and unbiased source of technical software data/information, and provides support to all elements of the software community.

The charter of the DACS covers all aspects of Software Engineering and Technology in support of military, government, industrial and academic users. It also offers a wide-variety of Technical Services designed to support the acquisition, development, testing, validation, transition and maintenance of software.
